

NAMAA MARKETS

Business Requirements Document

Website Outline, Functional Specification & Wireframes

Field	Detail
Document Version	1.0
Status	Draft for Review
Date	July 8, 2026
Prepared For	Namaa Markets — Product & Founding Team
Platform Type	Forex Intelligence & Financial Education Platform
Primary Markets	Arabic-speaking traders + global retail FX audience

Table of Contents

1. Executive Summary

Namaa Markets is a forex intelligence and financial education platform built for two audiences at once: retail traders who need protection from broker fraud, and beginners who need trustworthy, structured education. The platform combines a verified broker directory, a Bloomberg/TradingView-style economic calendar with drill-down event detail, market news, a free video academy, practical trading tools, and a dedicated scam-alert system that functions as the brand's core trust differentiator.

This document defines the complete business requirements, information architecture, and page-level wireframes needed to build Phase 1 of the platform. It reflects two recently confirmed feature enhancements: (1) an expandable Specs + History detail panel on every Calendar event row, modeled on the ForexFactory calendar experience, and (2) a free, no-signup video library within the Academy section.

The design system uses a Deep Navy, Premium Gold, and Soft Background palette, with visual references to Bloomberg, Apple, and TradingView — prioritizing data density, credibility, and clarity over decorative styling.

2. Business Objectives

- Establish Namaa Markets as a trusted, editorially credible source for forex traders in Arabic-speaking and global markets.
- Differentiate from generic financial portals through the Scam Alerts system — building trust as the primary acquisition and retention driver.
- Convert free-tier users (video academy, tools, news) into premium subscribers and course purchasers.
- Generate broker advertising and affiliate revenue through a high-intent Brokers directory.
- Build recurring engagement through a daily-use Economic Calendar with deep, ForexFactory-grade event detail.
- Lower the barrier to entry for new traders with a completely free educational video library, used as a funnel into paid Academy content.

3. Scope

3.1 In Scope — Phase 1

- Home, Brokers, Calendar (enhanced), News, Academy (enhanced), Tools, and Scam Alerts pages
- Expandable Specs + History detail panel per calendar event
- Free video library within Academy, plus structured free learning paths
- Broker directory with filtering, comparison, and affiliate links
- Scam Alert directory with public submission form
- Core trading calculator tools
- Responsive web layout (desktop-first, tablet/mobile adapted)

3.2 Out of Scope — Phase 1

- Native mobile apps (iOS/Android)
- Live trading execution or brokerage integration
- User-to-user community/forum features
- Paid course checkout flow (premium tier is scoped as a landing/waitlist experience in Phase 1)
- Multi-language UI toggle beyond initial Arabic/English content strategy (full i18n system deferred)

4. Target Audience & User Personas

Persona	Profile	Primary Need	Key Pages
The Cautious Beginner	New to trading, Arabic-speaking or global, wary of scams	Education + broker safety verification	Academy, Scam Alerts, Brokers
The Active Trader	Trades regularly, needs fast data	Real-time calendar, news, tools	Calendar, Tools, News
The Broker Shopper	Comparing brokers before depositing	Transparent comparison + regulation info	Brokers, Scam Alerts
The Self-Learner	Wants to upskill at no cost before committing	Free structured video content	Academy

5. Revenue Model

Stream	Mechanism	Primary Page(s)
Broker Advertising	Paid placement/featured slots in directory & Home carousel	Brokers, Home
Affiliate Commissions	Referral links to broker sign-ups	Brokers
Premium Memberships	Paid tier: certified courses, advanced tools, ad-free experience	Academy, Tools
Paid Courses	Structured, certificate-bearing courses beyond free video library	Academy

The free Academy video library is a deliberate funnel: it builds trust and demonstrates teaching quality at zero friction, then upsells into premium certified courses.

6. Site Architecture / Sitemap

1. Home
2. Brokers
3. Calendar (Specs + History detail panel)
4. News
5. Academy (Free Video Library + Paid Courses)
6. Tools
7. Scam Alerts

Global elements present on every page: persistent top navigation, footer with legal/risk disclaimer (required for financial content), and a sign-up call-to-action in the header.

7. Design System

Element	Specification
Primary Palette	Deep Navy (backgrounds/header), Premium Gold (accents/CTAs), Soft Background (content areas)
Visual References	Bloomberg (data density), Apple (clarity/whitespace), TradingView (charting UX)
Typography	Clean sans-serif, strong hierarchy for data tables and numeric content
Tone	Professional, credible, protective — avoids hype-driven fintech styling
Localization Note	Arabic-speaking audience requires RTL layout support and Arabic typography testing across all data tables

8. Home

Purpose

The Home page is the platform's front door: it establishes credibility within seconds, routes each persona to the right destination (brokers, calendar, academy, or scam alerts), and surfaces timely content to encourage return visits.

Key Features

Feature	Description
Hero Section	Primary value proposition and dual CTA (Explore Brokers / Check Scam Alerts)
Trust Strip	Four credibility badges reinforcing verified brokers, live alerts, free academy, real-time data
Market Snapshot Widget	Pulls today's top 2-3 events directly from the Calendar module
Featured Brokers Carousel	Paid/featured broker placements — primary ad revenue surface
Latest News Grid	Three most recent news articles
Scam Alert Callout Banner	High-visibility strip surfacing the latest verified scam alerts
Academy Promo Banner	Drives traffic to the free video library

Detailed Section Breakdown

1. Header & Navigation

Persistent navy header with logo, primary nav (Home, Brokers, Calendar, News, Academy, Tools, Scam Alerts), and a gold 'Sign Up Free' CTA button.

2. Hero Banner

Full-width navy banner with headline, subheading, and two CTA buttons routing to Brokers and Scam Alerts respectively — the two highest-trust actions.

3. Trust Strip

Four equal-width badge tiles placed directly beneath the hero to reinforce credibility before any content is read.

- Verified Brokers
- Live Scam Alerts
- Free Academy
- Real-Time Calendar

4. Market Snapshot Widget

A compact live-data card summarizing the day's key economic events, sourced from the Calendar module's API, encouraging click-through to the full Calendar page.

5. Featured Brokers Carousel

Four-card horizontal carousel of paid/featured brokers, each with logo, one-line pitch, and a 'View' CTA linking to the broker's detail page.

6. Latest News Grid

Three-column card grid of the most recent news articles with thumbnail, headline, and excerpt.

7. Scam Alert Callout Banner

Dark red high-contrast banner surfacing the count of new scam alerts this week, linking directly to the Scam Alerts page.

8. Academy Promo Banner

Navy/gold banner promoting the free video academy as a zero-friction entry point, with 'Start Learning' CTA.

9. Footer

Standard four-column footer (Company, Product, Legal, Connect) plus mandatory financial risk disclaimer.

Wireframe

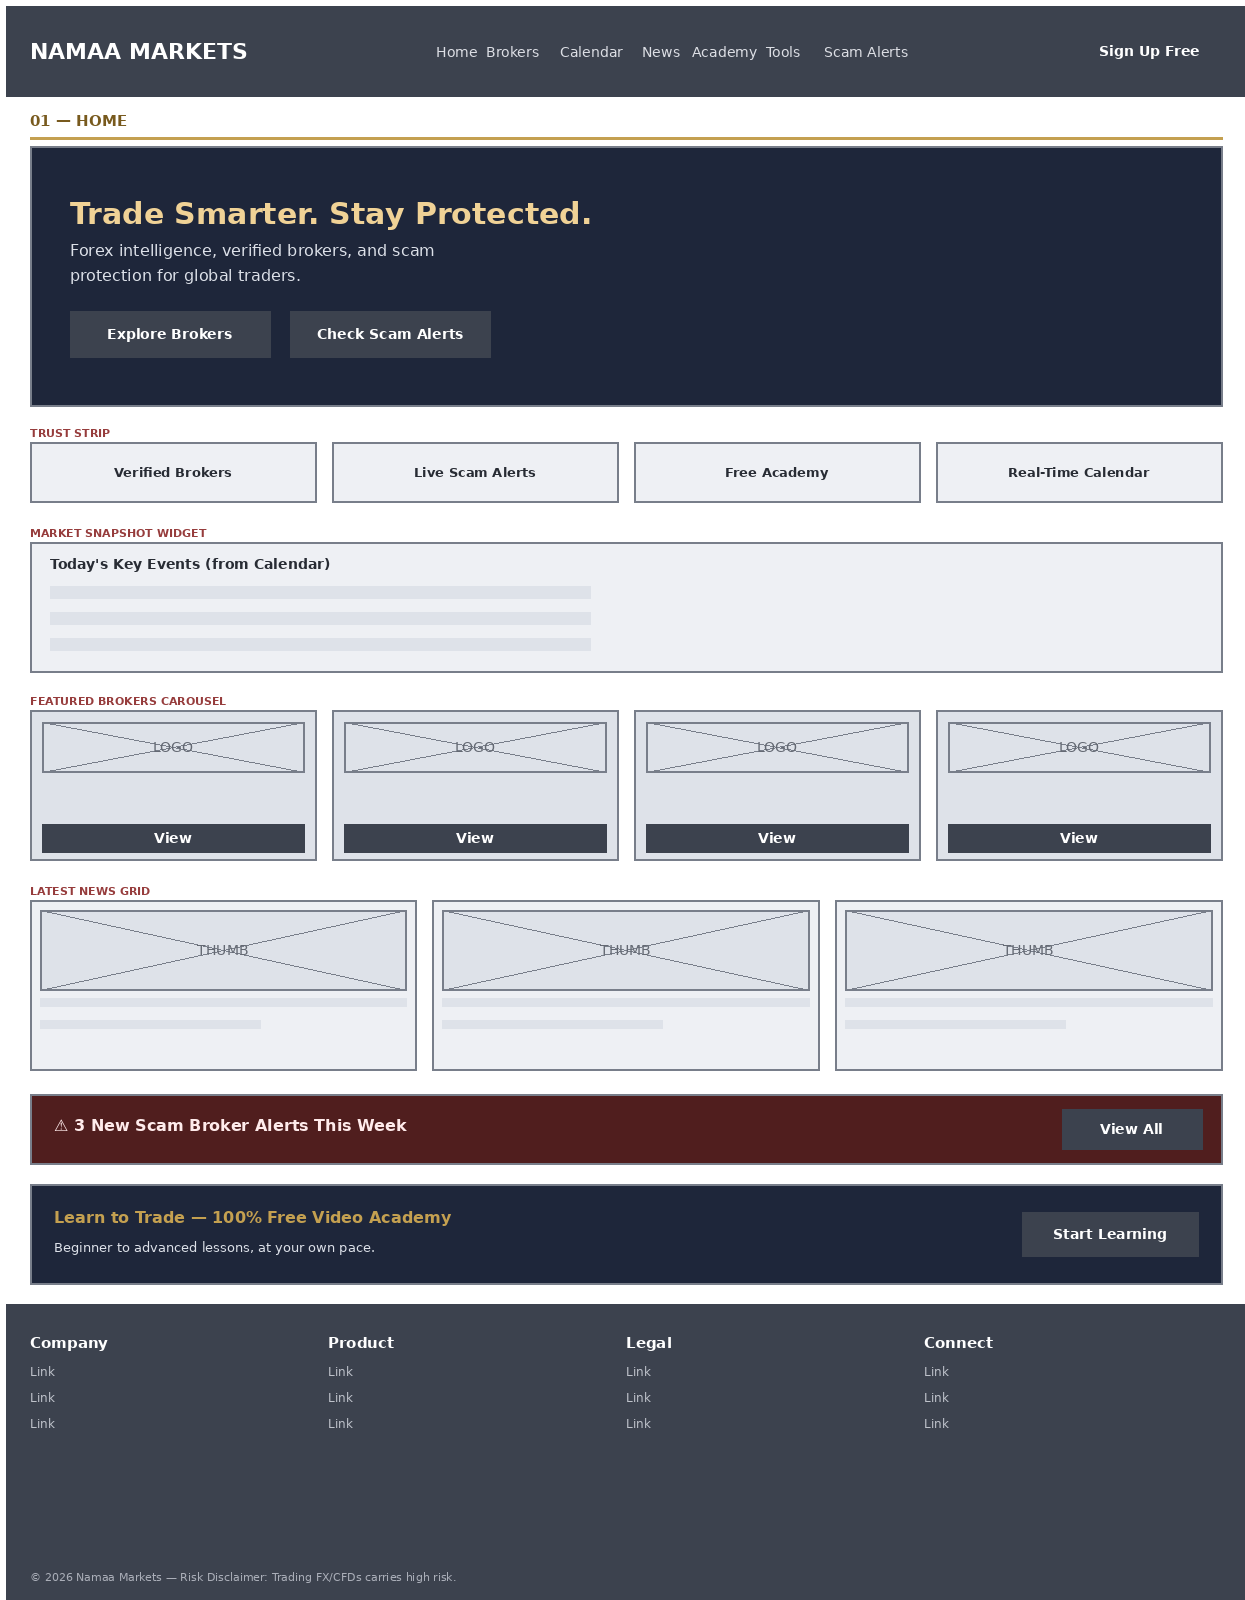

Figure 1 — Home page wireframe

User Flow / Interactions

8. User lands on Home and reads hero value proposition.
9. User clicks a trust badge or scans the Market Snapshot Widget for today's events.

10. User either clicks through to Brokers (comparison intent), Calendar (data intent), or Academy (learning intent).
11. Scam Alert banner is visible on every visit, reinforcing brand safety positioning regardless of the user's primary path.

Data Requirements / Content Sources

- Featured broker placements (manually curated / paid tier)
- Live feed from Calendar module (top 2-3 events by impact)
- Latest 3 published News articles
- Latest count/summary from Scam Alerts module

9. Brokers

Purpose

The Brokers page is the platform's primary monetization surface, giving traders a filterable, comparable directory of brokers while generating advertising and affiliate revenue.

Key Features

Feature	Description
Filter Sidebar	Regulation, minimum deposit, platform type, and spread type filters
Sort & Result Count Bar	Sort by rating, minimum deposit, or regulation strength
Broker Comparison Cards	Logo, rating, regulation badges, min deposit, and dual CTA (Visit / Compare)
Compare Mode	Side-by-side comparison of selected brokers (2-4 at a time)
Pagination	Standard paginated listing

Detailed Section Breakdown

1. Filter Sidebar

Left-hand persistent sidebar with checkbox filter groups for Regulation (FCA, ASIC, CySEC, etc.), Minimum Deposit range, Platform (MT4/MT5, cTrader, Web), and Spread Type (Fixed/Variable), with an Apply Filters action.

2. Sort & Result Bar

Displays live result count and a sort dropdown (Rating, Min Deposit, Regulation Strength, Featured First).

3. Broker Cards

Each row-style card shows broker logo, name, short trust summary, regulation badges, minimum deposit, and two CTAs: 'Visit Broker' (affiliate link, opens new tab) and 'Compare' (adds to comparison tray).

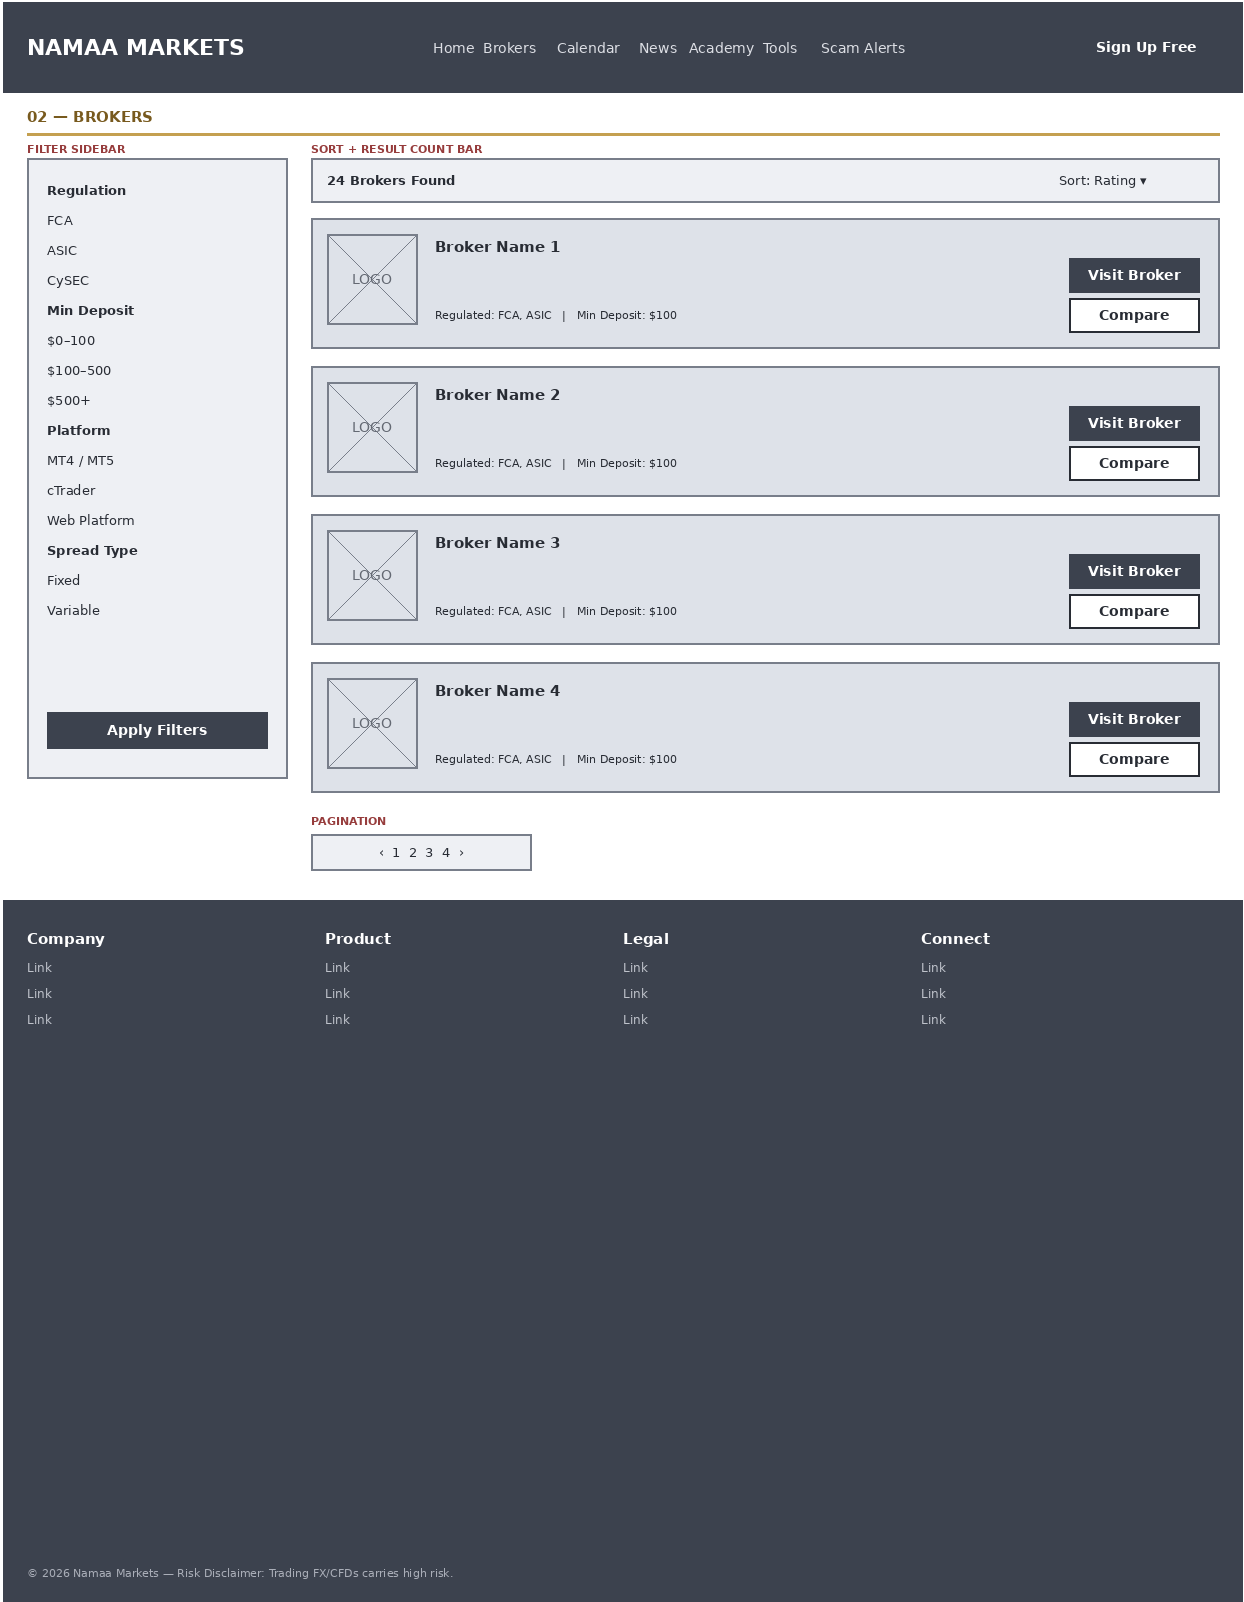

4. Comparison Tray / Mode

Selecting 'Compare' on 2-4 brokers activates a side-by-side comparison table covering spreads, regulation, platforms, deposit/withdrawal methods, and support quality.

5. Pagination

Standard numbered pagination beneath the listing.

Wireframe

14. User selects 2-3 brokers into Compare mode to view a side-by-side table.

15. User clicks 'Visit Broker' — affiliate link tracked, opens broker's site in a new tab.

Data Requirements / Content Sources

- Broker profile database (name, logo, regulation, deposit terms, platform support, affiliate URL, featured flag)
- Regulation status data, refreshed periodically for accuracy
- Editorial rating methodology (published separately for transparency)

10. Calendar (Enhanced)

Purpose

The Economic Calendar is the platform's highest-frequency-use page. It lists scheduled economic events with real-time actual/forecast/previous data, and — per the new requirement — each row expands into a two-panel Specs + History detail view matching the ForexFactory reference model, giving traders deep context without leaving the page.

Key Features

Feature	Description
Date Navigator	Horizontal date strip to move between days
Filter Bar	Currency, impact level, and session filters
Calendar Grid	Time, currency, event, impact, actual, forecast, previous columns
Expandable Row Detail — Specs Panel	NEW: source, measures, usual effect, frequency, next release, analyst notes, alternate names, acronym
Expandable Row Detail — History Panel	NEW: past release history table plus Related Stories feed
Range/Graph Toggle	Historical bar/line chart per indicator with adjustable range

Detailed Section Breakdown

1. Date Navigator

Horizontal strip allowing the user to move between days/weeks, with 'Today' visually distinguished.

2. Filter Bar

Filters for Currency, Impact (low/medium/high), and Session, plus a keyword search for specific events.

3. Calendar Grid (Collapsed State)

Standard row-based table: Time, Currency, Event Name, Impact indicator (dot icons), Actual, Forecast, Previous. Rows are click-to-expand.

4. Expanded Row — Specs Panel (NEW)

Left-hand panel revealed on row expansion, presenting static reference data for the indicator: Source (with link to latest release), Measures (what the metric captures), Usual Effect (directional relationship to currency), Frequency, Next Release date, Analyst/editorial Notes, Derivation methodology, Alternate names, and Acronym expansion — directly modeled on the ForexFactory Specs panel.

5. Expanded Row — History Panel (NEW)

Right-hand panel showing a scrollable table of the indicator's past releases (Date, Actual, Forecast, Previous), plus a 'Related Stories' feed linking news articles that reference this specific indicator.

6. Chart/Graph View

Optional bar/line historical chart per indicator with a draggable range slider, toggled from the expanded row or a dedicated icon.

© 2026 Namaa Markets — Risk Disclaimer: Trading FX/CFDs carries high risk.

Figure 3 — Calendar page wireframe, showing one row expanded into the Specs + History detail panel

User Flow / Interactions

16.User arrives on Calendar defaulted to Today, all currencies, all impact levels.

17.User filters to a specific currency or impact level (e.g., High impact, USD).

18. User clicks a row to expand it inline, revealing the Specs panel (left) and History panel (right).
19. User reviews the Specs panel to understand what the indicator measures and its usual market effect before the release.
20. User reviews the History panel to gauge recent trend and reads a linked Related Story for context.
21. User optionally opens the full historical chart/graph view for deeper trend analysis.

Data Requirements / Content Sources

- Real-time economic calendar data feed (time, currency, event, impact, actual/forecast/previous) — third-party data provider integration required
- Static reference dataset per indicator: source, measures, usual effect, frequency, derivation, alternate names, acronym
- Historical release archive per indicator (for the History panel and chart)
- News-to-indicator tagging system to power the Related Stories feed

11. News

Purpose

The News page delivers timely market journalism and cross-links contextually into the Calendar's indicator-specific Related Stories feed, reinforcing the platform's data-plus-narrative positioning.

Key Features

Feature	Description
Category Tabs	Filter by Forex, Commodities, Central Banks, Crypto, Economy
Featured Story	Editorially highlighted top story
Trending Sidebar	Most-read articles
News Grid	Paginated article grid
Related Indicator Sidebar	Links articles back to specific Calendar events

Detailed Section Breakdown

1. Category Tabs

Horizontal tab bar for filtering the feed by topic category.

2. Featured Story Block

Large hero-style card for the top editorial pick, with image, headline, and excerpt.

3. Trending Sidebar

Right-hand rail listing the 4 most-read articles by traffic.

4. News Grid

Three-column paginated grid of article cards (thumbnail, headline, excerpt, timestamp).

5. Related Indicator Sidebar

Secondary sidebar module tagging which Calendar indicators a given article references, linking directly back to that indicator's expanded Specs/History panel.

Wireframe

Figure 4 — News page wireframe

User Flow / Interactions

22. User filters by category (e.g., Central Banks).
23. User reads featured story or scans the grid.

24. User clicks an article; sidebar shows which Calendar indicators are referenced.

25. User clicks through to the relevant Calendar event for deeper data context.

Data Requirements / Content Sources

- CMS-managed news articles with category, tags, and indicator references
- Traffic data to power the Trending sidebar

12. Academy (Enhanced)

Purpose

The Academy is the platform's education and trust-building engine. Per the new requirement, it now leads with a completely free, no-signup video library covering financial markets fundamentals, serving as a zero-friction funnel into structured learning paths and, eventually, premium certified courses.

Key Features

Feature	Description
Search & Level Filter	Filter lessons by level and topic
Free Video Library	NEW: grid of free educational videos with duration and level tags
Structured Learning Paths	Free, sequenced lesson tracks (e.g., FX Foundations)
Premium Upsell Banner	Promotes certified courses and mentorship

Detailed Section Breakdown

1. Academy Hero

Navy/gold banner establishing the free-education value proposition front and center.

2. Search & Filter Bar

Keyword search plus Level (Beginner/Intermediate/Advanced) and Topic filters.

3. Free Video Library (NEW)

Card grid of free video lessons, each showing thumbnail, title, duration, and level tag. Explicitly labeled 'Free' with no signup wall, covering topics such as forex basics, candlestick reading, risk management, and using the platform's own Calendar tool.

- What is Forex?
- Reading Candlesticks
- Risk Management 101
- Using the Calendar
- Technical Analysis Basics
- Fundamental Analysis
- Trading Psychology
- Chart Patterns

4. Structured Learning Paths

Three free, sequenced tracks bundling related videos into a guided curriculum (e.g., 'FX Foundations', 'Technical Trader', 'Risk & Psychology'), each showing lesson count and free-access status.

5. Premium Upsell Banner

Dark gold banner promoting certified paid courses and 1:1 mentorship as the natural next step after the free content.

Wireframe

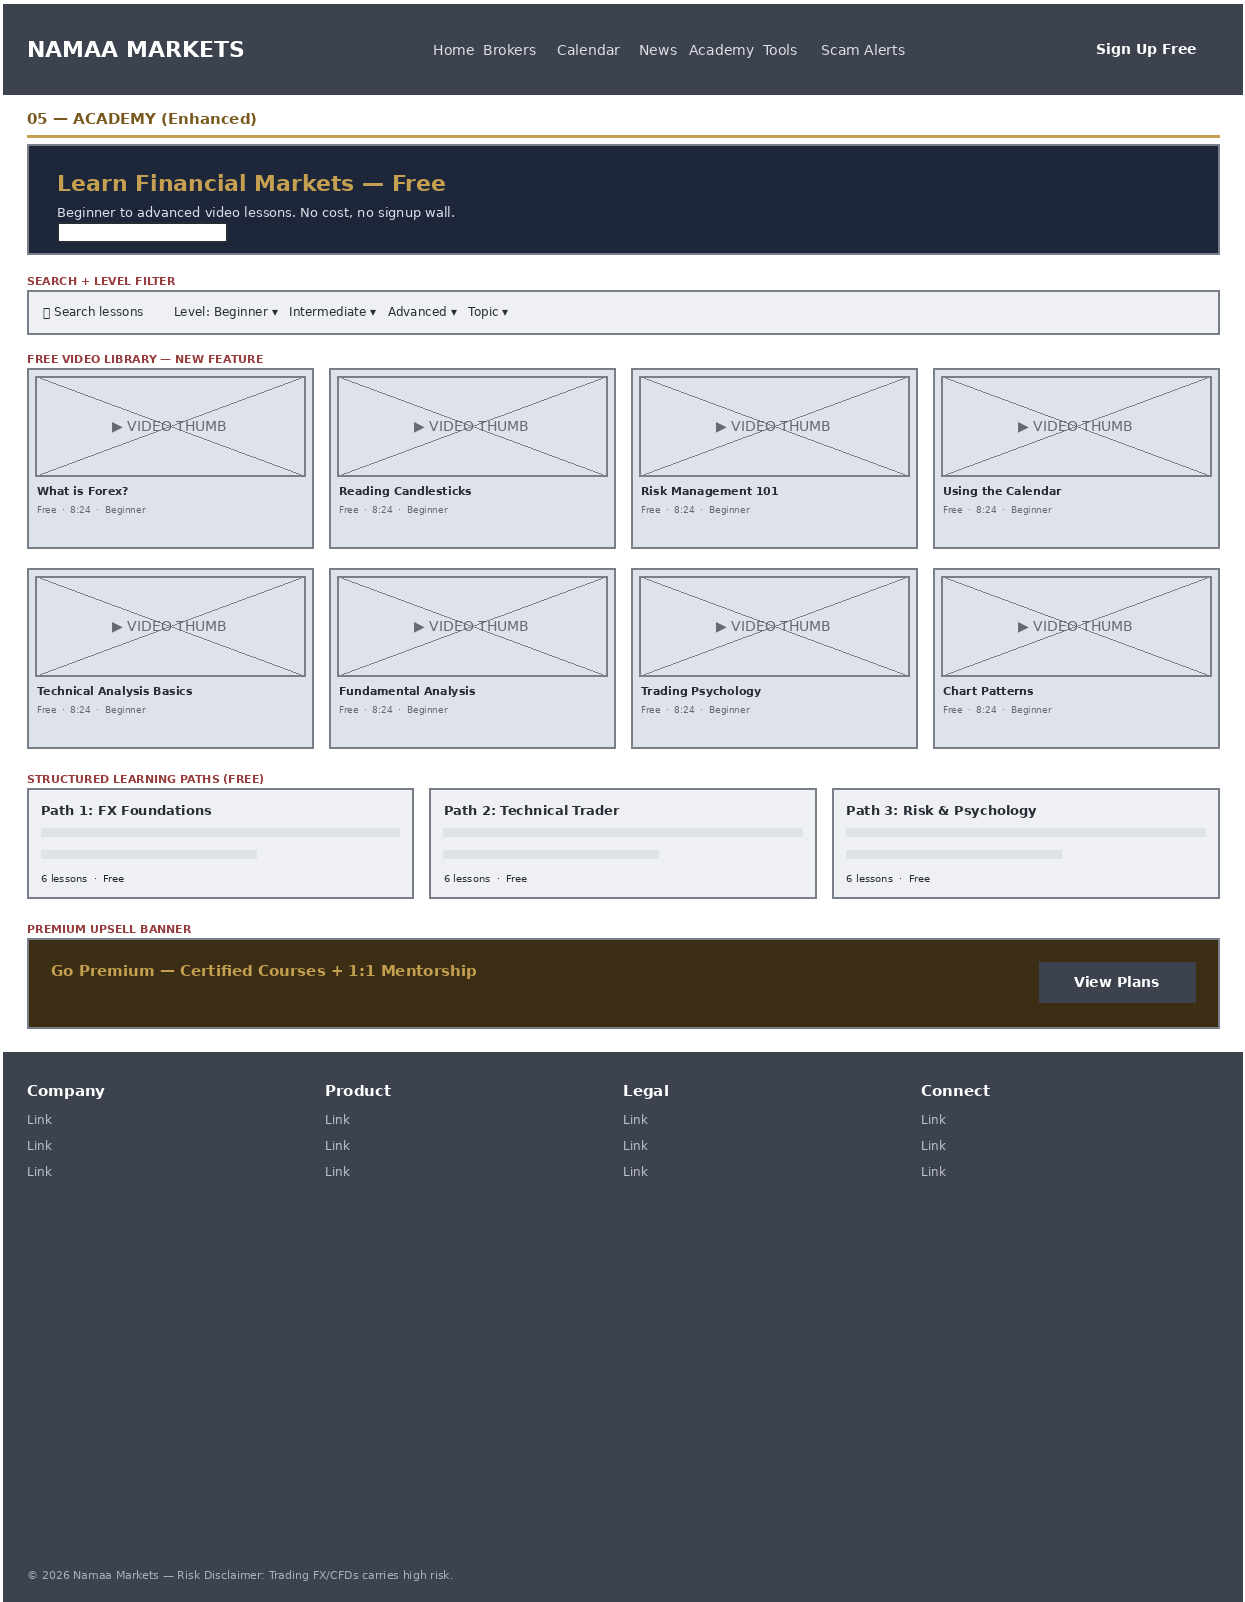

Figure 5 — Academy page wireframe, showing the new free video library

User Flow / Interactions

- 26.User arrives at Academy, sees hero confirming content is free.
- 27.User filters by level (e.g., Beginner) and browses the video grid.

- 28. User watches a free video inline or on a dedicated lesson page.
- 29. User is guided into a structured learning path bundling related free videos.
- 30. User is shown the Premium upsell banner after completing free content, prompting upgrade consideration.

Data Requirements / Content Sources

- Video content library (title, thumbnail, duration, level, topic tags, hosting URL)
- Learning path structure (ordered lists of videos with progress tracking, if implemented)
- Premium course catalog (for the upsell banner, linking to a landing/waitlist page in Phase 1)

13. Tools

Purpose

The Tools page provides practical trading calculators that support day-to-day decision-making and drive repeat visits between Calendar checks.

Key Features

Feature	Description
Tool Cards Grid	Six core calculators, each opening an inline workspace
Active Tool Workspace	Input form and result display for the selected tool

Detailed Section Breakdown

1. Tool Cards Grid

Six cards covering Pip Value Calculator, Margin Calculator, Position Size Calculator, Currency Converter, Profit/Loss Calculator, and a Mini Economic Calendar widget for quick reference.

2. Active Tool Workspace

Selecting a tool opens an inline calculator with labeled input fields (e.g., Currency Pair, Trade Size, Account Currency) and a clearly separated results display panel.

Wireframe

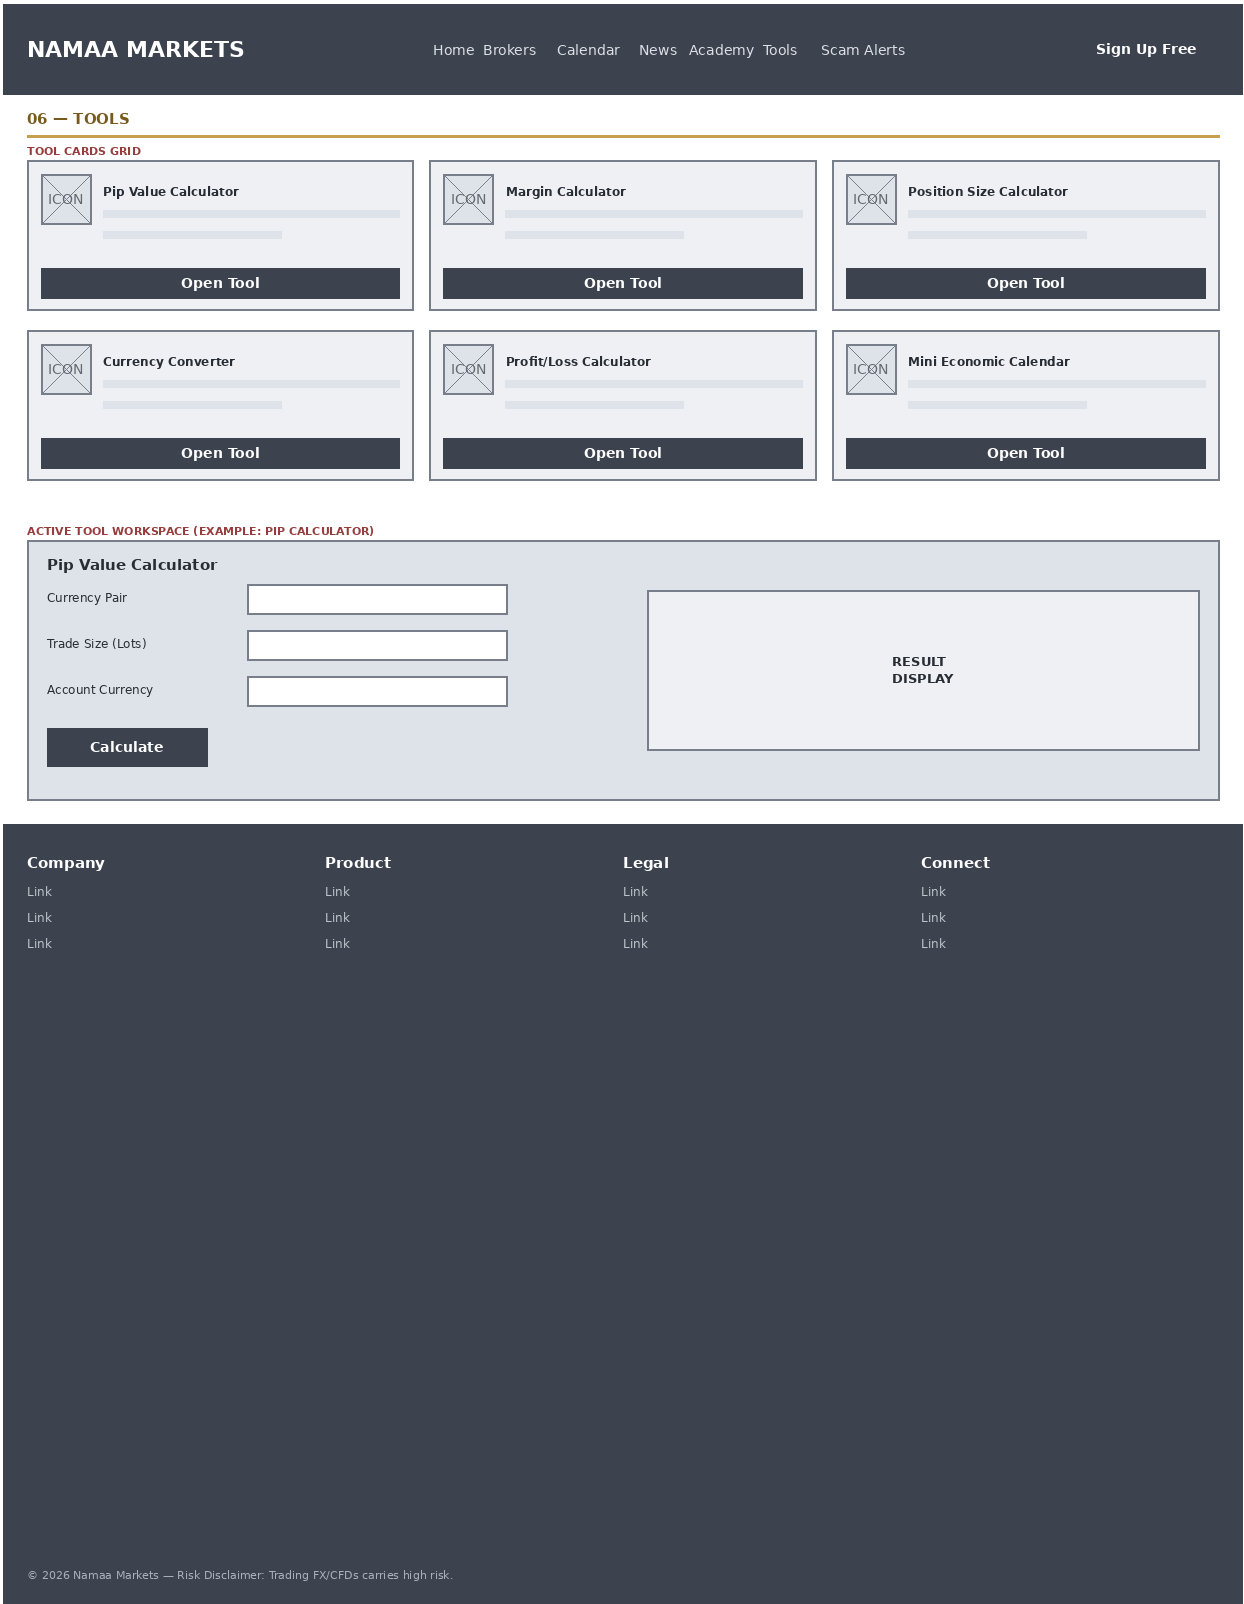

Figure 6 — Tools page wireframe

User Flow / Interactions

- 31.User selects a tool card (e.g., Pip Value Calculator).
- 32.User fills in required inputs.

- 33. User clicks Calculate; result displays inline without page reload.
- 34. User can switch tools without leaving the page via the card grid.

Data Requirements / Content Sources

- Live or reference exchange rate feed (for Currency Converter and Pip Value calculations)
- Standard lot-size and margin formulas per instrument type

14. Scam Alerts

Purpose

Scam Alerts is the platform's core trust differentiator: a public, searchable directory of verified fraudulent or high-risk brokers, paired with a community reporting mechanism and educational guidance on spotting scams.

Key Features

Feature	Description
Search & Filter Bar	Filter by status, region, and date
Verified Scam Listing	Editorially verified scam broker cards with evidence links
Submit a Report Form	Public submission form for suspected scams
How to Spot a Scam Sidebar	Educational tips reinforcing platform authority

Detailed Section Breakdown

1. Alert Banner

Dark red header banner stating the page's purpose: community-reported, editorially verified scam alerts.

2. Search & Filter Bar

Search by broker name, filter by Status (Verified Scam / Under Investigation / Cleared), Region, and Date.

3. Verified Scam Listing

Each card shows broker logo, name, a 'SCAM' status badge, a short summary of the issue, and a 'View Evidence' CTA linking to the detailed case file.

4. Submit a Report Form

Right-hand sidebar form capturing Broker Name, Evidence (text/upload), and Contact Email, submitted for editorial review before publication.

5. How to Spot a Scam Sidebar

Static educational tip list (e.g., no regulation license, guaranteed profit claims, withdrawal blocking, pressure tactics, fake reviews) reinforcing the platform's protective positioning.

Wireframe

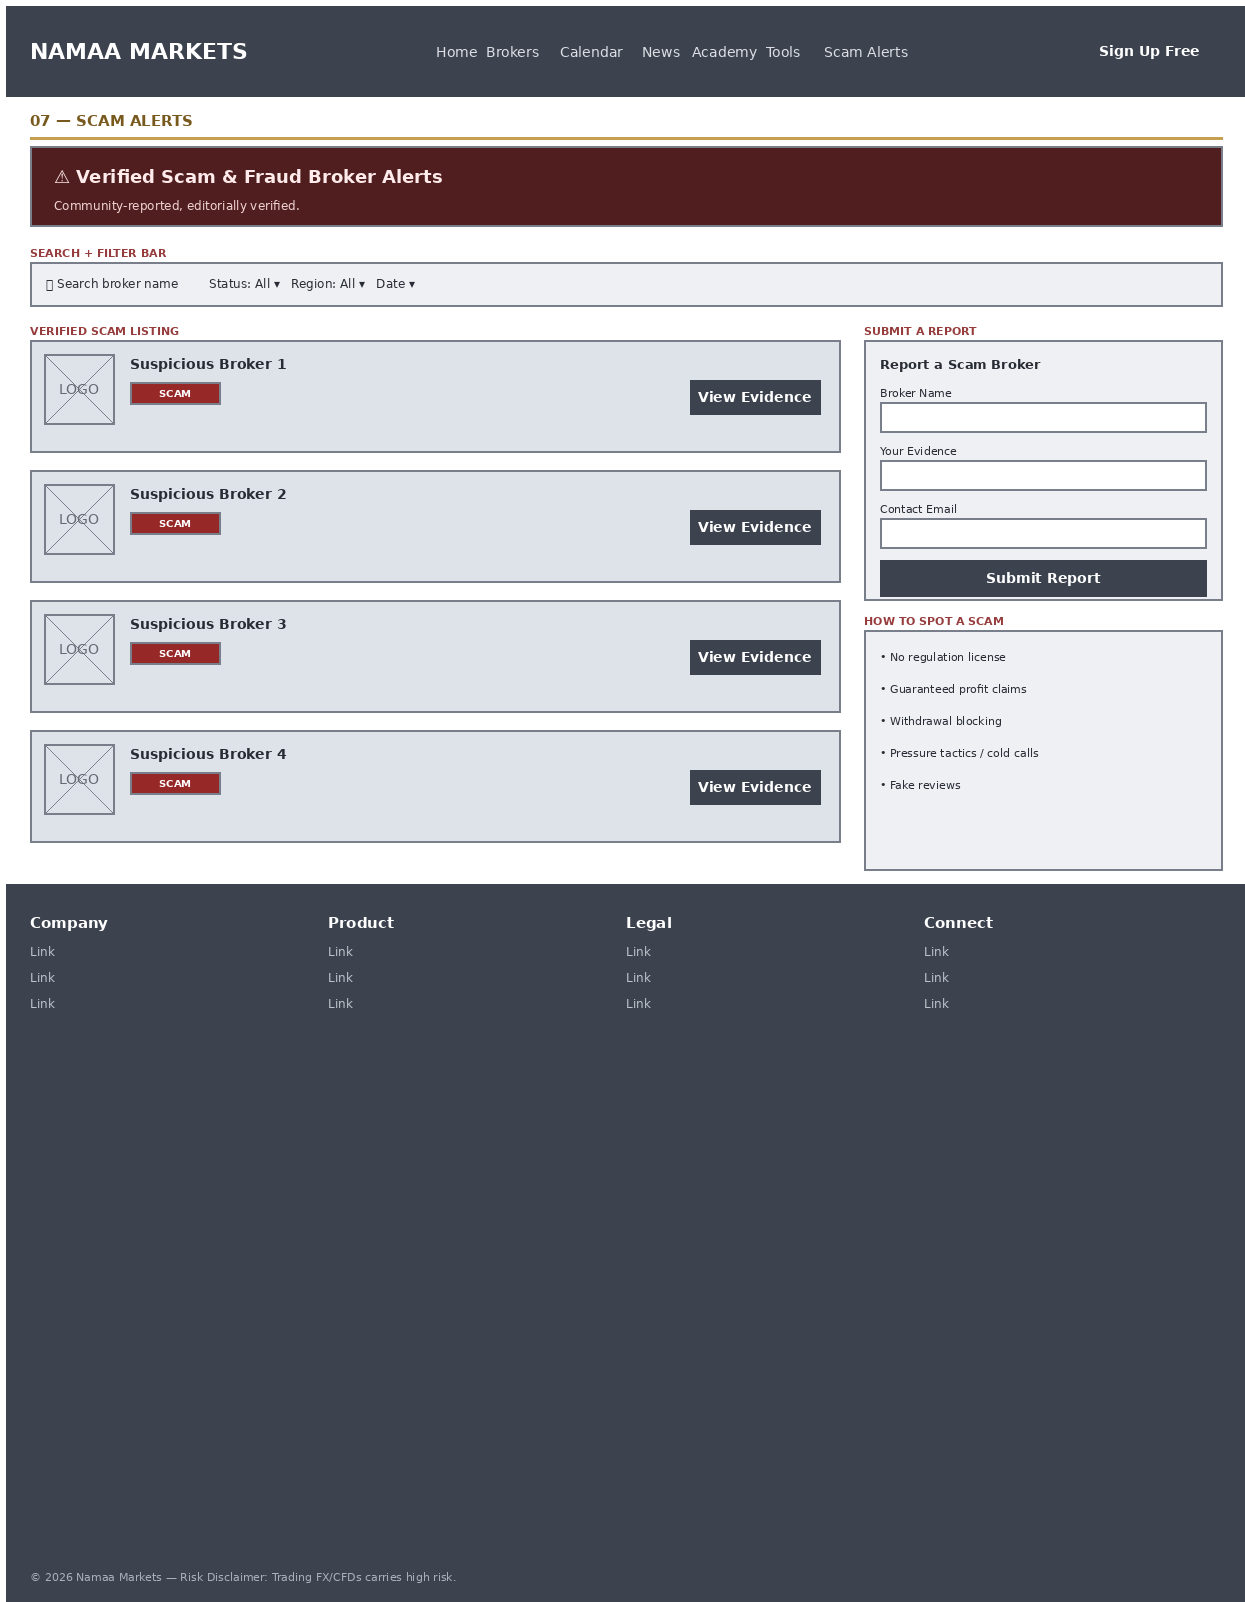

Figure 7 — Scam Alerts page wireframe

User Flow / Interactions

35. User searches for a specific broker name before depositing funds.
36. User reviews status badge and evidence for any matching result.

- 37.If no scam is on record, the user is reassured but reminded to check regulation independently.
- 38.User optionally submits a new report using the sidebar form, which enters an editorial review queue before publication.

Data Requirements / Content Sources

- Editorially verified scam case database (broker name, status, evidence links, date, region)
- Public submission intake queue with moderation workflow before a report goes live
- Static 'how to spot a scam' educational content, maintained by the editorial team

15. Non-Functional Requirements

15.1 Performance

- Calendar grid and expandable Specs/History panels must load event data in under 1.5s on standard broadband.
- Home page core content visible within 2s on 4G mobile connections.

15.2 Responsiveness

- Desktop-first design; all pages adapt to tablet and mobile breakpoints.
- Calendar grid collapses lower-priority columns (e.g., Previous) on narrow viewports, expandable on tap.

15.3 Localization

- Arabic-speaking audience requires RTL layout support; all data tables (Calendar, Brokers, Scam Alerts) must be tested in RTL mode.
- Numeric and financial data (percentages, currency figures) must remain left-to-right within RTL text per standard convention.

15.4 Compliance & Trust

- Persistent financial risk disclaimer in the footer on every page, given FX/CFD trading risk.
- Scam Alerts submissions require an editorial moderation step before publication to manage legal/defamation risk.
- Broker affiliate links must be clearly disclosed as sponsored/affiliate where required.

15.5 Accessibility

- Color contrast in the Deep Navy / Premium Gold palette must meet WCAG AA, particularly for data table text.
- All calculators in Tools must be keyboard-navigable with labeled form fields.

16. Success Metrics / KPIs

Metric	Target Area
Broker click-through rate (directory → affiliate link)	Revenue
Scam Alert page monthly unique visitors	Trust / Brand
Free video completion rate	Academy engagement
Free-to-premium Academy conversion rate	Revenue
Calendar daily active users + avg. rows expanded per session	Core engagement
Scam report submissions per month	Community trust signal

17. Assumptions & Dependencies

- A licensed economic-calendar data provider will be integrated for real-time and historical event data (build vs. buy decision required).

- Video hosting for the free Academy library (self-hosted or third-party, e.g., Vimeo/YouTube embed) to be confirmed before development.
- Broker regulation data will require periodic manual or API-based verification to remain accurate.
- Scam Alert publication requires an internal editorial/legal review process, not defined in this document.
- Premium membership checkout/payment infrastructure is a Phase 2 dependency; Phase 1 ships a waitlist/landing experience only.

18. Appendix — Glossary

Term	Definition
Specs Panel	Static reference data shown for a Calendar indicator: source, measures, usual effect, frequency, etc.
History Panel	Table of an indicator's past releases plus related news, shown alongside the Specs panel.
Impact Level	Editorial/data-provider rating of how strongly an event typically moves markets (Low/Medium/High).
Featured Broker	A broker in a paid placement slot within the directory or Home carousel.
Free Video Library	The no-signup-required educational video collection within Academy.
